

IN THE CLAIMS:

Please cancel claims 1-20 without prejudice to or disclaimer of the subject matter recited therein.

Please add new claims 21-31 as follows:

LISTING OF CURRENT CLAIMS

Claims 1-20. (Canceled)

21. (New) A flashlight structure comprising:

- a) a casing and having a power source;
- b) a housing connected to an end of the casing and having a plurality of heat sinks located on an exterior periphery thereof;
- 5 c) a base inserted into an interior of the housing adjacent to the plurality of heat sinks and having:
 - i) an exterior peripheral surface engaging the interior of the housing along a length of the base;
 - ii) a conducting point electrically connected to a positive terminal of the power source, a negative terminal of the power source is electrically connected to the base; and
 - iii) an isolation piece isolating the conducting point; and
- d) a luminary having an anode electrode electrically connected to the conducting point and a cathode electrode electrically connected to the base.

22. (New) The flashlight structure according to claim 21, wherein the plurality of heat sinks are located on the housing between the luminary and the conducting point of the base.

23. (New) The flashlight structure according to claim 21, further comprising a holding sleeve located on around an outer periphery of the casing.

24. (New) The flashlight structure according to claim 23, wherein the holding sleeve is made of a heat-insulating material.

25. (New) The flashlight structure according to claim 23, wherein the holding sleeve is made of a rubber material.

26. (New) The flashlight structure according to claim 21, further comprising a switch connected to the power source for selectively controlling a power supply to the luminary.

27. (New) The flashlight structure according to claim 21, further comprising a reflective piece located in the interior of the housing around the luminary, and a cover set located on an end of the housing opposite the casing.

28. (New) The flashlight structure according to claim 21, wherein the luminary is a light emitting diode.

29. (New) The flashlight structure according to claim 21, wherein the base, the housing and the casing are made of a heat-conducting and electric-conducting material.

30. (New) The flashlight structure according to claim 21, wherein the base, the housing and the casing are made of an aluminum alloy.

31. (New) The flashlight structure according to claim 21, wherein the housing and the base are integrally made.
